Education

2018 - 2022| BSCS

Superior University

Mahmood Ahmad

React Native Developer – Android & iOS (2+ years)

Experience

Present

Transcure

React Native Developer

Created React Native applications through Agile sprints, incorporated AI and STS APIs, developed voice and audio functionalities, and enhanced API performance for improved scalability.

Feb 2024 – Mar 2025

Techesthete

React Developer

Contributed to the development and improvement of React Native mobile applications by collaborating with senior developers and product managers during Agile sprints.

Projects

MyLera – Fitness & Wellness App

- Developed cross-platform app with iOS/Android health data integration.
- Built challenge systems with rewards, streaks, and social sharing.
- Integrated GPT API to monitor vitals and detect health imbalances.
- Optimized performance and synced external health APIs seamlessly.

Pharmed Pulse (Pharmaceutical - Confidential Project) *In Progress*

- Integrated AI via STS and text-to-text APIs for automated interactions.
- Developed real-time text and audio messaging for seamless communication.
- Built automated scheduling logic to optimize meeting coordination.
- Implemented role-based UI and access control for secure functionality.

Ventally

In Progress

- Built mental health app with chat and call features.
- Added mood tracking and charts for emotional trends.
- Managed roles for Admins, Listeners, and Venters.
- Created easy ways for users to connect and find support.

ULEXE – Salon Booking Platform

- Built appointment booking features for beauty salons.
- Integrated map functionality for nearby salon discovery.
- Implemented real-time availability and working hours display.
- Enhanced user experience with intuitive booking flows.

Inventory Management App

- Built B2B platform for wholesalers and small retailers.
- Developed inventory management and purchasing modules.
- Implemented RBAC for Admin, Sub-Admin, and Buyer roles.
- Integrated Stripe for secure, role-based payment processing.

CTLFX (In Progress)

- Designed streamlined transaction history and secure wallet interfaces.
- Developed trading app for balance, deposit, and withdrawal management.
- Implemented real-time local currency conversion for user accounts.

Project Runner – Construction Task Management

- Developed a task management system for construction site logistics.
- Built material assignment logic for cement, bricks, and equipment.
- Integrated site mapping with precise start and end location tracking.
- Implemented multi-role access for constructors and forklift operators.

Shopeo – E-commerce Application

- Ecommerce app
- Created buyer/seller tools for listings and carts.
- Built systems for tracking and managing orders.
- Developed separate roles for sellers and buyers.
